

Edmonton R User Group

Meetup - Oct 28, 2021

<https://www.meetup.com/edmonton-r-user-group-yegrug>

<https://yegrug.github.io>

Last Thursday of every month, 6-8 pm

We're an online and in-person **R-enthusiast group** hosting **live speaking events** on a range of topics, from data wrangling to visualization and Shiny.

Learn R, hone your skills, network, or just stay up-to-date.
All skill levels are welcome!

Edmonton is located on Treaty 6 territory, a traditional gathering place for diverse Indigenous peoples including the Cree, Blackfoot, Métis, Nakota Sioux, Iroquois, Dene, and many others whose histories, languages, and cultures continue to influence our community.

Please introduce yourselves

You all rock!

What best describes your current experience level with R?

9 responses

- Never used it before, but I want to know what all the fuss is about
- I've dabbled a tiny bit, but could use a refresher and/or more practice
- I know my way around common applications, and use it semi-frequently
- I use R frequently (either professionally, in my education, or for personal projects)
- My Stackoverflow reputation is higher than my bank account (I'm an expert!)

Statistics? Really?

Which R-related topics interest you the most?

9 responses

You hardcores!

Would you prefer more interactive live-coding together as a group, or presentations from guest speakers in YEG RUG meetups?

9 responses

R and open science

Steffi LaZerte

The image shows a screenshot of the OpenSci website. The background is a solid orange color. The website header is a blue bar with the OpenSci logo on the left and navigation links for 'About', 'Blog', 'Projects', 'Packages', 'Community', and 'Resources' on the right. Below the header, there is a dark blue banner with a 'New!' badge and a link to 'Generating and customizing badges in r-universe'. The main content area has a blue background with a white geometric pattern. It features the headline 'Transforming science through open data, software & reproducibility' and a sub-headline 'We help develop R packages for the sciences via community driven learning, review and maintenance of contributed software in the R ecosystem'. At the bottom, there are two buttons: 'Browse Our Packages' and 'Our Mission'.

Dev Edmonton Society

Fostering a stronger software development community
in Edmonton.

We are made up of people who believe that an impactful, diverse, and collaborative developer community enriches us all. We realize this vision by sharing knowledge and ideas, understanding the community and its needs, promoting events and initiatives, and supporting technology meetups and organizations.
